

Melissa Zatica

I graduated with my bachelors degree in Social Work in 2016, and have spent the last 5 years working in the Fairbanks Community in the human services field. When I am not serving families through my role as a Social Services Manager, I am usually hanging out with my family and friends. I spend the summers gardening, as well as kayaking and enjoying the sunshine while helping out my parents on their farm. I have a passion for helping families and children, and love the diversity in the ANE program and helping guide students while supporting their families. I look forward to an amazing year, and am here if you need me.
