

# How to Take Care of Your Device

Here are some helpful hints to protect your Chromebook or iPad.

## Hold it safely.

Use both hands to carry it.

Use it at a desk or table!  
Don't use it while walking.

Don't pick it up by the screen! That's how they break.

## Wash your hands.

Keep your computer clean!

## Keep food and drinks away

Liquids like water, juice, milk and soda can ruin a computer!

Food can get stuck in the keys!

## Keep it away from small children and pets!

Little kids aren't always careful!

Pets can chew on cords and computers!

## Tell an adult if you have any problem!

Is your computer not working?

Did you have an accident with it?

Did you see something that isn't appropriate?
