# SAFETY GUIDELINES

## **RATIONAL:**

The Fairbanks North Star Borough School District (FNSBSD) is committed to ensuring a safe environment for all students and staff. Physical education safety is the responsibility of the entire community, not just students and teachers. Providing appropriate footwear and protective equipment and modeling safe play emphasizes the importance of safety both in and out of school.

Guidelines for motor skills (e.g., dribble, catch, kick, strike, throw, volley, jump, rhythm, locomotor, balance, rolling, weight transfer) are listed below. If not specifically noted, the guideline applies to all motor skills.

## **EQUIPMENT:**

- Use equipment that is appropriate for the age, size, strength, and skill level of students.
- Use equipment that is in good condition.
- Shin guards are recommended for complete games (e.g., dribble-foot).
- Eyes goggles are required; tooth and mouth protection is recommended (e.g., strike).
- Knee pads are recommended for competitive games (e.g., volley).
- Use ropes of appropriate length for size and ability of students (e.g., jump).
- Provide landing mats for high jumping activities (e.g., jump).
- Use electrical equipment that is in good working order (e.g., rhythm, locomotor).
- Provide safety accommodations for specific equipment as needed (e.g., balance, rolling).
- Helmets, wrist guards and knee pads are required for inline or roller skating and biking.
- Use mats appropriate to equipment used (e.g., rolling, weight transfer).

## **CLOTHING/FOOTWEAR:**

- Wear non-marking, secured athletic/court shoes.
- Wear no jewelry.
- Sun protection is recommended if playing outdoors.
- Wear weather-appropriate clothing.
- Shin guards are recommended for additional protection (e.g., kick).

## **FACILITIES:**

- Play in an area that is free from debris and obstructions and that provides safe footing.
- Where an end wall is close to the baseline, place protective gym mats or padding beyond the *key* area.
- Where a stage is close to the baseline, place gym mats over the edge of the stage and extend them to the floor.
- Make sure the floor is dry.
- Use collapsible, soft cones to mark boundaries and lines.
- Provide adequate personal space (e.g., jump).

## **AQUATICS:**

- Walk on deck.
- No gum.
- No open cuts/rashes.
- Always respect the call of the teacher and/or lifeguard, whether using his/her voice or whistle.

## **SUPERVISION:**

Provide qualified on-site supervision

**SPECIAL RULES/INSTRUCTION:**

- Teach skills in proper progression.
- Base games and activities on skills that are taught.
- Modify activity and rules to suit the age and ability of students and the facilities/equipment available.
- Modify activity and rules to suit the age and ability of students and the facilities/equipment available.
- Clearly outline safety procedures to students.
- Provide appropriate warm-up and cool-down activities.
- Stress good sportsmanship behavior.
- Teach students to stop activity immediately when a specific signal is given.
- Stress student responsibility regarding the need for individual space (e.g., strike, jump, equipment {swing diameter}).
- Insist that students must never climb on or hang from indoor or outdoor goals or nets (e.g., dribble, catch, kick, strike, throw, volley).
- Stress appropriate body contact, with control, for the activity (e.g., dribble, catch, kick, volley, rhythm, locomotor, balance, rolling, weight transfer).
- When space is restricted, throw, and catch in the same direction (e.g., catch, throw).
- Clearly identify a crease area if using a goalie (e.g., dribble-foot, kick, strike).
- No sticks above the knee when swinging (e.g., floor hockey, strike).
- Students should not jump from anything higher than their shoulder height (e.g., jump).
- Stress safe practices in protecting neck and head in tumbling activities (e.g., rolling).
- Climbing: (e.g., weight transfer)
  - Place cargo net anchors (rope holders) out of climber's way.
  - Limit number of students climbing cargo net, rope, or climbing wall at one time. For climbing wall, limit should be one student per 4-foot panel.
  - Climb toward the center of the cargo net.
  - Do not race on any climbing apparatus.
  - Climb no higher than 10 feet from the floor on a climbing rope; a crash pad mat must be used underneath.
  - Maintain 3-points of contact with the climbing wall (i.e., move only one hand or one foot at a time).
  - Students must not walk on the mats beneath where someone is climbing.
  - Climbers must climb down, not jump off, the climbing wall.
  - Climbers must keep feet near the red safety-line when one is in use.

**SUGGESTED SAFETY EQUIPMENT:**

- Crash pad
- Face masks
- Mats (as appropriate; 4" thickness for climbing wall)
- Wrist guards
- *Extra safe* shoes
- Helmets
- Shin guards
- Eye goggles
- Knee pads
- Tooth/mouth protection

Re: Dodgeball Recommendation

When dodgeball or variations of dodgeball are offered at a school, the following recommendations, based on recommendations from the Borough Risk Manager, the PE/Health Content Leadership Team and the NASPE Standards, should be adhered to:

Dodgeball, or variations of dodgeball, is not a curricular activity. It may be used as a special event activity. Special events include:

- Field days
- Fund raisers
- Schoolwide celebrations
- Competitions outside the PE classroom
- Family nights
- Intramural events

Any dodgeball, or variations of dodgeball, special event activities will include the following guidelines:

- Voluntary participation by students
- Soft (Nerf-type) balls must be used
- No hitting above the shoulder
- Teachers/facilitators must participate in district-provided training (to be offered in the Fall)

These guidelines are included in the PE Curriculum Appendix.
