

Symptom Free Schools

Wellness Check for Students & Staff

The Wellness Check is provided to families and staff to understand the district's expectations of what families and staff should do to help keep schools symptom free.

The district is offering FREE antigen and PCR testing through Beacon locations at the Administrative Center, North Pole High, West Valley High; your school nurse; and by requesting an at-home testing kit (antigen only).

Individuals interested in testing should schedule an appointment or request an at-home testing kit at k12northstar.org/COVID.

Close Contact

Student/Staff has been exposed to someone who tests positive for COVID-19.

Families and staff are encouraged to follow the guidance of Public Health, however the district is not requiring quarantine for close contacts as long as they have **no symptoms**.

Testing is strongly recommended for those who cannot quarantine or isolate from a positive case in the household.
